

Spring Return and Double Acting Pneumatic Quarter-Turn Actuators For Output Torques to 27,624 lb.in.

Features and Benefits

- Compact rack and pinion design utilizes the whole piston area to develop output torque.
- Pistons with integral rack drive reduce the number of dynamic seals, minimizing air leakage.
- Double pistons nullify sideloads on the pinion shaft, minimizing bearing wear and extending life.
- Internal air porting eliminates external tubing.
- Hard anodized aluminum body with external electrostatic powder coating (ESPC) finish protects against corrosive environments.
- Female output drive enables direct mounting of most Keystone valves, eliminating special adaptation connections and assuring correct alignment.
- Bottom entry pinion shaft simplifies assembly and provides anti-blowout feature.
- Anti-friction piston pads ensure no metal-to-metal contact, providing smooth operation. Ideal for modulating or on/off control applications.
- Adjustable travel stops standard in both directions on sizes 065 to 181.
- An extensive range of standard accessories are available for direct mounting.
 - Solenoid valves
 - Limit switchboxes
 - Positioners
 - Dec clutchable manual override gearbox
 - High visibility indicator

General Applications

For remote control of any quarter-turn application, including ball, butterfly or rotary plug valves, dampers, etc.

Technical Data

Max. Supply Pressure:	150 psig
Rated Supply Pressure:	120 psig
Double Acting Torque:	27,624 lb.in. @ 120 psig
Spring End Torque:	10,155 lb.in. @ 100 psig
Temperature Range:	-4°F to 200°F [-20°C to 90°C]
Optional Temperature Ranges Available:	-15°F to 300°F [-26°C to 150°C] -40°F to 160°F [-40°C to 71°C]

Double Acting Pneumatic Quarter-Turn Actuator

Spring Return Pneumatic Quarter-Turn Actuator

Materials of Construction

Part	Material	US Material Standard	UK Material Standard	DIN Material Standard
1 Body	Extruded aluminum (hard anodized and ESPC*)	ASTM B221	BS1474 6063	DIN 3.33206.51
2 End cap	Die-cast aluminum LM6 or LM24 (ESPC*)	ASTM B85	BS1490	DIN 1725 - 230 or 226
3 Piston (003 only) Piston (006-181)	Glass filled nylon 66 Die-cast aluminum (anodized) LM6 or LM24	ASTM B85	BS1490	DIN 1725 - 230 or 226
4 Pinion shaft	Carbon steel (sealbond - N coated)	ASTM A108	BS970 080M40	C40
5 Bearings	Engineered polymer			
6 O-rings	Nitrile			
7 Fasteners	304 stainless steel	ASTM A193	BS970 Part 3 - 304/305	DIN 267 Part 3
8 Indicator	ABS			
9 Spring	Spring steel (ESPC*)	ASTM A401	BS5216 HS3	DIN 17223 Pti
10 Spring Cone	Die-cast aluminum LM6	ASTM B85	BS1490	DIN 1725
11 Spring retaining bolt	Steel (plated)	ASTM A193	BS970 Part 3 - 304/305	DIN 267 Part 3

* electrostatic powder coating

Notes

- Operating times under no load for air pressures from 40 psig to 100 psig. (Times based on actual measurements.)
- Total time is defined as time required from switching solenoid valve to completion of 90 degree stroke.
- Stroke times can be increased or decreased dramatically by using speed controls, oversized pilot valves or quick-exhaust valves.
- Air Consumption:
Cubic inches shown in chart represent actual free air volume in either open or close direction. Air consumption will vary depending on supply pressure. To determine standard cubic feet per minute use the following formula:

Double Acting SCFM =

$$\left(\frac{\text{Open} + \text{Close Vol. in}^3}{1728} \right) \left(\frac{\text{Supply Air psig} + 14.7}{14.7} \right) (\text{Cycles/Min})$$

Spring Return SCFM =

$$\left(\frac{\text{Air Stroke Vol. in}^3}{1728} \right) \left(\frac{\text{Supply Air psig} + 14.7}{14.7} \right) (\text{Cycles/Min})$$

Example: Calculate SCFM for size 036 double acting using 80 psig air supply and 5 cycles/minute.

Double Acting SCFM =

$$\left(\frac{.119 + .83}{1728} \right) \left(\frac{80 + 14.7}{14.7} \right) (5) \text{ SCFM} = 3.77$$

- All Double Acting Actuator operating times are based on using a standard Tyco 5/2 solenoid valve with nominal .7C_v.
- All Spring Return Actuator operating times are based on using a standard Tyco 3/2 solenoid valve with nominal .4C_v.

Double Acting Actuator Operating Times (seconds)

Actuator Size	Stroke Time	Total Time
003	0.16	0.24
006	0.26	0.37
012	0.45	0.64
024	0.90	1.22

General Information

- A. A comprehensive range of adaptors are available to suit all Tyco valve stems.
- B. Actuators can be mounted parallel or perpendicular to valve flow.

Sizes 065 to 181

- C. On sizes 065 to 181, the total travel of 100 degrees allows for end-of-travel adjustment of 5 degrees over and 7 degrees under at both open and close positions.
- D. Travel stop bolts (when present) must not be used for manual override.
- E. Mounting pattern with 5.00 PCD is only available on 180/181 size with the use of a 0.75 thick mounting plate.

Notes

Each body has both types of accessory mounting pads.

1. Tyco standard mounting pad
2. NAMUR mounting pad

Actuator Dimensions (inches)

Westlock Controls - Accessories

Quantum Rotary Control Monitors*

- 764/784/864**, Weathertight
- 765/789/865**, Non-incendive
- 711/722/811**, Intrinsically Safe
- 777/877/360**, Explosionproof

Quantum products offer a fully integrated solution for the monitoring and control of process valves. Combining sensors, Falcon low-powered solenoids, junction housings and a local visual position indicator in one compact unit suitable for weatherproof and hazardous location service, Westlock offers an extremely efficient and cost effective method for the monitoring and controlling of rotary valves.

AccuTrak™ Rotary Position Monitors*

- 1040/2004 and 9358/9044**, Rotary Position Monitors, Weathertight
- K-Switch, 9468**, Rotary Position Monitor, Non-incendive
- 5004/5044 and 5050**, Rotary Position Monitors, Intrinsically Safe
- 360, 2007 and 9479**, Rotary Position Monitors, Explosionproof

The AccuTrak™ family of products offers an integrated solution for the monitoring of process valves. By combining sensors, junction housings and local visual position indication in one compact unit suitable for weatherproof and hazardous location service, Westlock offers an extremely efficient and cost effective method of both monitoring and controlling linear and rotary valves.

* **Stainless Steel, AccuTrak, Quantum, Intellis Network Solutions and Positioners** - please consult your sales representative for the availability of global certifications such as ATEX, IEC, GOST, CSA and InMetro for specific configurations in these product lines, as approvals may vary.

Westlock Controls - Accessories (continued)

Positioners*

- ICoT 5200/5300**, Intelligent SmartCal Positioners
- ICoT 5400**, FOUNDATION Fieldbus™ Positioner
- EaziCal**, Electro-Pneumatic Positioner
- 793**, Pneumatic Positioners

Westlock Controls offers a variety of solutions for the precise positioning of rotary and linear pneumatic actuators. These positioners are suitable for use with either double acting or spring return actuators. Mounting options include the ModMount®, NAMUR standards (VDI/VDE 3845) or actuator special kits. These units also provide the simplest form of installation and calibration as standard, without the requirement for additional equipment. Positioners are available with both HART® and FOUNDATION Fieldbus™ digital communication protocols.

Network Solutions*

Intellis Network Solutions, Control Monitors; Network Accessories

Intellis is a family of industrial control field Network Control Monitors which use embedded control systems to automate valves and link field I/O to the host PLC or DCS. Each monitor is assigned a unique address and accepts input/output signals from valve position sensors, solenoids and external alarm and control devices. Hall Effect sensors are utilized for valve position monitoring. Low-power Falcon solenoid valve provide integrated actuation control. Network interface modules Pacs allow communication via a protocol of choice. Westlock Intellis Network Control Monitors are available for linear or rotary applications in all area classifications.

Intellis Control Monitor
