KEYSTONE

Thin Disc Resilient Seated Butterfly Valves Sizes 1 thru 20-inch to 150 psi

Features and Benefits

- One-piece, thin profile, 316 Stainless steel disc/stem provides minimum obstruction to flow, resulting in highest C_v, lowest pressure drops and best control characteristics. Also available with PTFE, NBR or EPDM molded disc.
- Triple function, resilient dovetail seat isolates body and stem from line media, provides drop-tight shutoff of line media at full-rated pressure and permits convenient and economical replacement in the field.
- Heavy duty, corrosion resistant top bushing provides upper stem support, absorbs actuator sideloading and extends valve cycle life.
- Bi-directional, self-adjusting double
 V-cup stem seals prevent external contaminants from entering the valve.
- Split body design enables easy field replacement of seat and disc/stem and permits direct mounting of Keystone actuators without the use of couplings or brackets.

General Application

Figure 990 (wafer) and Figure 920 (lug) are used when sanitary service or corrosion resistance is required. Heavy duty applications include food and beverage, pharmaceutical, pulp and paper, mining and power industries. Available with PTFE lining for light corrosive services and rubber lining for light abrasive services.

Total Flow Control Solutions[™]

Technical Data

Sizes:

1 thru 20-inch (Figure 990) Wafer 2 thru 20-inch (Figure 920) Lug

Pressure Ratings: 1 thru 12-inch – 150 psi 14 thru 20-inch – 75 psi

- PTFE or elastomer mold disc 2 thru 12-inch – 100 psi 14 thru 20-inch – 75 psi
- White NBR seats 2 thru 20-inch – 50 psi

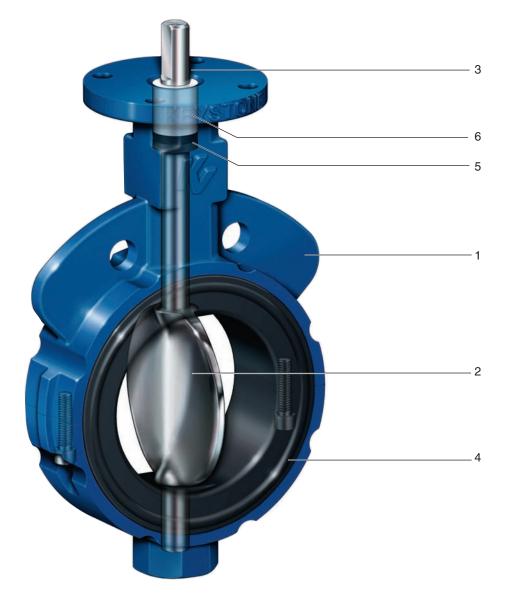

Flange Standard

Figure 990 is a resilient-seated, wafer-style, butterfly valve suitable for installation between ANSI Class 125/150 flanges.

Figure 920 provides drilled and tapped lugs around the valve body, compatible with ANSI Class 125/150 flange standards.

Keystone is either a trademark or registered trademark of Tyco International Services AG or its affiliates in the United States and/or other countries. All other brand names, product names, or trademarks belong to their respective holders.

Materials

| N | laterials | | |
|----|-------------------------------|--|---|
| | Part | Material | Material Standard |
| 1. | Two-piece body with top plate | Cast iron Ductile iron (Lug style only) 316 Stainless steel | ASTM A-126, Class B ASTM A-395 GR 60/40/18 ASTM A-743 CF8M ¹ |
| 2. | Thin profile disc | 316 Stainless steel Steel Teflon [®] molded ² Steel EPDM molded ² Steel NBR molded ² | |
| З. | Stem | 316 Stainless steel | |
| 4. | Seat | NBR food grade (0°F thru 212°F) EPDM food grade (-40°F thru 250 PTFE-lined EPDM (-20°F thru 300 PTFE-lined NBR (0°F thru 250°F) |)°F) |
| 5. | Stem packing | NBR | |
| 6. | Upper stem bushing | Polyester | |

Notes

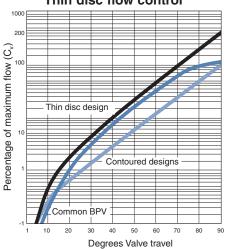

- Not available on 2¹/₂-inch and 5-inch. Stainless steel bodies, 2 thru 6-inch, include upper and lower stem bearings.
- 2. Not available on 1-inch, 11/2-inch, 21/2-inch and 5-inch.
- 3. Teflon[®] is a registered trademark of E.I. du Pont de Nemours Company.

PTFE Lined

Flow Control Characteristic

While most butterfly valves achieve an equal percentage characteristic, the Keystone thin-profile disc design does so at a significantly higher capacity through the valve's full travel. This results in not only 100:1 rangeability (Maximum C_v /Minimum C_v), but also greatly increased turndown ratio (Maximum Flow/Minimum Flow).

Thin disc flow control

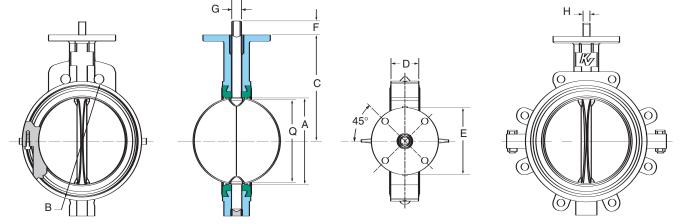

Flow Coefficient (C_v)

| Valve | | 20 ° | | • | e of Disc | | | | |

Notes

1. H dimension refers to flat on stem.

2. 1-inch and 11/2-inch valve assemblies are furnished with integral 10-position throttling plate.

3. 'Q' dimension is the minimum allowable pipe or flange inside diameter at the centered body face to protect the disc sealing edge against damage when opening the valve.
